

SWIMMING POOLS OF BLOCRY SPORTSCENTRE

2013-2014

LOUVAIN-LA-NEUVE – Castinia street

In process

CATEGORY

Public building / Renovation / Special techniques

IDENTIFICATION

Renovation of the roofs of Bolcry Sportscentre (complex of 2 swimming pools + 1 building with cloakrooms, toilets, technical rooms, administrative rooms and café).

OWNER

City of Ottignies

PROJET MANAGER

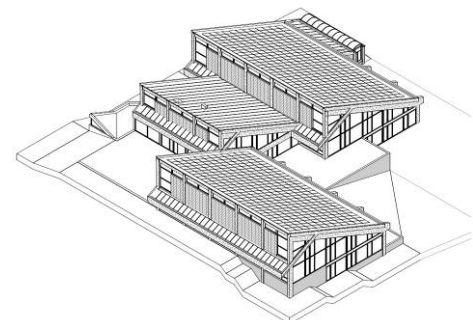

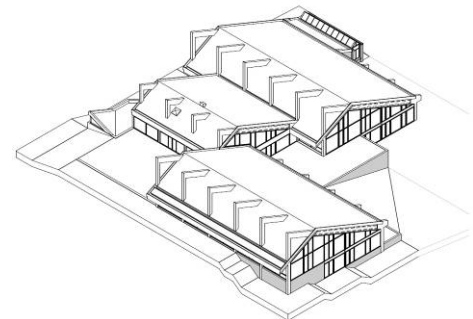

EXAS sprl / Atelier MARTIN & Associés

BUDGET

Infrasports subsidy

MISSION

- Complete mission as project manager.
- Study of stability of the existing concrete structures and of the new northwestern facades.
- Study of the thermal performance of the existing buildings and presentation of several proposals of improvement in energy efficiency of the general envelope.

CHARACTERISTICS

- The existing architecture dates back to 1970. Its supporting structures are made of non-insulated reinforced concrete in the external part (roof and facade traves), which means important thermal bridges.
- Existing roof cover in asbestos cement sheets.
- The thermal solar panels dating back to the late seventies placed on the roofs of the swimming pools are not operated any more.
- Replacement of the roof covers
- Modification of the northwestern facades of both swimming pools and of the café.
- New photovoltaic plant.
- Renovation of the lighting of the swimming pools.
